**Alberto Mendoza Morales : Colombia on the Wing: Landscapes** before purchasing it in order to gage whether or not it would be worth my time, and all praised Colombia on the Wing: Landscapes:

Traveling from the islands of the Caribbean Sea and the Pacific Ocean to the various inland landscapes of mangrove swamps, jungles, plains, and deserts, this aerial journey over Colombia illustrates a land of diverse climates and ecosystems. This collection of stunning photographs concentrates particularly on the areas that have remained untouched by humans, showing breathtaking examples of native flora and fauna, cloud forests and highlands, and the perpetual snow that adorns the peaks of Colombias highest mountains. A profound reflection regarding the countrys marvelous natural world, its underlying message encourages continued efforts towards conservation and sustainable development.
