The Comprehensive Reference Guide is an excellent source for students to acquire information on 233 countries from around the world. As a middle school social studies teacher it is one of the first books I encourage my students to research when we begin studying a new region. We have five in the class. Countries are listed in alphabetical order in a well-organized table of contents. Each page is laid out in an easy-to-read format and contains general information on a specific country that includes a miniature map, flag (it's black and white and I wish it was color), population, languages, type of government, geography, climate, economy, life-style, and a section on interesting facts. In the back are maps of the seven continents and fourteen blank maps that can be duplicated for tests. There is also a currency appendix that gives the country, the name of its basic monetary unit and its equivalent. It also has an easy-to-read

eighteen page index. This is a good book to have if you are teaching or just interested in finding out basic facts on different countries.

Just look in the cross-reference index of this handy guide to ALL of the countries of the world! Each entry includes short summaries of the geographic location, topography, climate, economy, points of interest, plus other information helpful for discussions about current events. Flags and maps included. For your convenience, this book lies flat and is organized alphabetically.
