Chris Craggs : Costa Blanca Rock (A Cicerone Guide) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Costa Blanca Rock (A Cicerone Guide):

Since the first edition of this guide there has been an explosion of rock climbing on the Costa Blanca and it is now one of the most popular climbing areas in Europe. Over 1500 routes are shown on almost 40 cliffs, from Leiva in the south to Aventador in the north, including favourites such as Sella, the Alicante/ Elda region, the Calpe area and Gandia. Other locations are described in English for the first time. This guide is the most comprehensive available to the area,

indispensable for the visiting climber.
