Hannah Robinson : Costa Rica: An Ecotraveller's Guide before purchasing it in order to gage whether or not it

would be worth my time, and all praised Costa Rica: An Ecotraveller's Guide:

0 of 0 people found the following review helpful. Costa Rica Ecotraveller's GuideBy Brian H. NordstromAn excellent resource for people like me who travel to see nature. I'm hoping to make my trip to Costa Rica within the next few years.0 of 0 people found the following review helpful. I did not use this for my trip to Costa RicaBy Kevin TuckerI bought another travel book that ended up getting used. This book is less functional and mainly provides some interesting information.1 of 1 people found the following review helpful. Good overview, but don't expect a field guideBy David MitchellThis book is excellent for planning, interesting ecology and climate notes, and for the flora and fauna highlights of each region. Do not expect a field guide that identifies each species, however.

This is the definitive ecotravel guide to Costa Rica, one of the world's best spots for nature lovers. More diversity is crammed into its borders per square mile than any other country in the world, and this book takes you to the best places to see it all. Canopy-top zipline? Turtle-watching? White-water kayaking? Hot springs? Volcanoes? Outdoor hammock by the sea?--"whatever your idea of eco-travel, this guidebook will show the way. Learn fascinating facts about Costa Rica's wildlife, such as vegetarian spiders, bees that collect perfumed oils, plants with their own heaters, and the ant dialect that caterpillars understand. Best of all, Hannah Robinson will tell you how and where to find all these plants and creatures.

About the AuthorHannah Robinson is a lifetime nature-watcher who has done research on the ecology of Costa Rica's tropical dry forests. She is trained as a biochemist and has been a wilderness guide with the National Parks Service. She is the author and PHOTOGRAPHER of Australia: An Ecotraveller's Guide.
