have high respect for the author and I find the front matter on skiing history and ski techniques very interesting informative. However, for a guidebook, I was disappointed to find NO maps of ski trails for anywhere. No ski tours are described. Instead each ski area is described in general terms. The description of developed ski facilities and lodging is good, but where's the ski trails? Furthermore, the coverage is spotty. All the areas around Tahoe and Donner are covered, but the southern and eastern Sierra and southern California ski areas are poorly represented. I recommend buying Marcus Libkind's "Ski Tours in the Sierra Nevada." He has 4 volumes for various parts of the Sierra and another book on Lassen. Disclaimer: I am not a professional reviewer hired by the publisher, but a real skier. 1 of 7 people found the following review helpful. An excellent guide to the best skiing. By Midwest Book Review Michael Jeneid's Cross-Country Skiing California provides a guide to both trails and resorts, with chapters covering all of the state's major ski regions and local accommodations as well. An excellent guide to the best skiing.

This combination how-to and trail guide covers virtually all of Northern California's groomed cross-country ski areas. Photos demonstrate ski techniques and reveal the beauty of the 22 areas covered.
