What I liked about this map was that it covers the Sacred Valley, which is where we spent all our time, between Cusco and Machu Picchu with an inset of Lima. What I disliked was the fact that the map tore the first time we used it. Annoying. Also some of the Cusco information was inaccurate and got us lost. That was annoying in the extreme. If you're the mapmaker, hello, the streets around the Qoricancha are not correct. We got lost trying to find the biggest landmark in Cusco thanks to your map.

Good map to have of that area. It made it easier to plan out activities before our vacation. It had a good section on Machu Picchu and the Sacred valley.

By Mary Alvarado  
Our guide book showed a walking tour to Sacsyhuaman from our hotel, but was not specific enough, this map helped us get there and back, very helpful

This latest edition of our popular regional map of the Cuzco area (scale 1:110,000) and of all of southern Peru (scale 1:1,500,000) has a new cover picture and updated road information. The famous Inca Trail is shown in detail with excellent inset maps of Machu Picchu (schema), Inca Trail-scale 1:50,000 as is the latest image of Machu Picchu, which is still being uncovered through archaeological digs and Lima-scale 1:13,500 to assist visitors. As with previous versions, the rest of side A consists of a detailed street plan of Cuzco itself, and the reverse side shows all of southern Peru from north of Lima to La Paz in Bolivia. The new road to Brazil is also shown, but we're really not sure how drivable it is. Now, one map will cover all the routes to Cuzco.
