National Geographic Maps - Adventure : Cyprus (National Geographic Adventure Map) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Cyprus (National Geographic Adventure Map):

6 of 6 people found the following review helpful. On the Road again in Turkey-THIS MAP IS A MUST!By Julie W. SnyderEvery summer, my husband starts to plan our Fall trip for 3-4 weeks and this year it is Turkey. We gather some good maps, guide books and he reads and explores the areas he would like to see inside a country. We usually start out in a large city, using the transportation system within the city itself, then rent a car for the duration of our travel and drive ourselves through the countryside. We will fly into Istanbul and begin our adventure after 4-5 days in that exciting city. When we do rent our car we will be following the Turkish coastline along the Mediterranean Sea for almost three weeks. PROS: 1. This is an excellent detailed map of the area in which we will be driving. 2. It is a high quality National Geographic map with a plasticized finish. We've had maps like this before and they hold up well. It is waterproof and tear-resistant. 3. The map's detail will complement our use of a GPS system. 4. The map highlights protected areas, points of interest and has an extensive town location index on the back. 5. Names of the Turkish cities on the map are printed in bold black letters. (I think I'll need this feature with the GPS system) 6. Purchasing National Geographic Maps helps to support the explorations and research projects that Nat'l Geog. conducts. CONS: 1. This map is NOT a map of the entire country of Turkey. It is fine for our trip because we are following the coast. Just make sure you order the map that best suits your needs. It is basically a map of the Western and Southern coastline of Turkey. I will add more after our trip which we are doing in late September-early October of 2013. UPDATE.... October 15, 2013.... UPDATE***This map is excellent. Seemed very up-to-date. Many of the roads "under construction" were clearly marked, so if our route didn't look like the actual map, I could tell where we were going.***There are hundreds of very small towns in Turkey along the major expressways and a good number are on this map. So it was clear where our location was.***Be aware that some towns/cities in Turkey have two names. Always look for the 2nd name for location.***Our Garmin went out with 5 days to go in the trip, including our car return back into Istanbul. It was a very good decision to buy this map. Between the map and Google maps we made it through our trip (which was wonderful!) 0 of 0 people found the following review helpful. The map itself is excellent, detailed and very useful. By CustomerThe map arrived on time. The only glitch was that whoever put the map in the envelope didn't do it carefully and it has now acquired a permanent diagonal crease. The map itself is excellent, detailed and very useful, especially when in the "Turkish" part of the Island, with the dual Greek and Turkish place names. 0 of 0 people found the following review helpful. Nice map, good scape. By Brian J. GiguereIt's difficult to find good travel maps that are at a scale that is usable. This one looks great, and is a similar scale to others we have used. Maps seem so old school, but when you are traveling to places that have sketchy cell reception they are a small price to pay.

Waterproof Tear-Resistant Travel Map National Geographic Cyprus Adventure Map provides global travelers with the perfect combination of detail and perspective in a highly functional travel tool. Cities and towns are clearly indicated and easy to find in the user-friendly index. A road network complete with distances and designations for roads, motorways, expressways, and secondary routes will help you find the route that's right for you. Hundreds of points of interest are highlighted including archeological sites, monuments, castles, mosques, churches, and more, making this map indispensable for travelers seeking to explore the regions rich history. Beaches, yachting harbors, and areas popular for fishing and diving dot Cyprus' extensive coastline. Other recreational destinations such as World Heritage sites, national parks, ski areas, golf courses, sports fields, and riding centers are included as well. The front side of the print map shows the western portion of the island. This side details the regions of Paphos, Limassol, Nicosia, Larnaca and Kyrenia. The reverse side of the map shows the eastern part of the island. This side details the regions of Larnaca, Kyrenia and Famagusta. A little over a third of the island is occupied by Turkish forces under the self-declared administration of the Turkish Republic of Northern Cyprus. The international community only recognizes the Republic of Cyprus, a member of the European Union, and views this Turkish occupation as illegal under international law. The locations of border crossings, closed borders, airports, harbors, and ferry routes take the guesswork out of travel around the island. Every Adventure Map is printed on durable synthetic paper, making them waterproof, tear-resistant and tough capable of withstanding the rigors of international travel. Map Scale = 1:165,000 Sheet Size = 37.75" x 25.5" Folded Size = 4.25" x 9.25"

About the Author Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps,

recreation maps, atlases, and globes which inspire people to care about and explore their world.
