**Tony Gould : Death in Chile: A Memoir and a Journey (Picador Books)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Death in Chile: A Memoir and a Journey (Picador Books):

This travel book combines autobiography, biography, literary and political history about the author's search for the truth about his close Chilean friend, the writer and political activist Christian Huneus. The author travelled to Chile to investigate the true life and times of this extraordinary figure, who embodied all the contradictions of the volatile Latin American spirit. At once a womanizer and hedonist as well as a committed political agitator, Christian lived a remarkable life in a country where politics is a matter of life and death. Through his story, Gould tells his own story and discovers that, though worlds apart, England and Chile's development over the years has startling parallels.
