Luckily we were only using it for my daughter's school project back drop, so we didn't need it for any major importance.This map is large, thick and sturdy. It does have a lot of information included on it. I would love to tell you exactly what, but I cannot read it.1 of 1 people found the following review helpful. Good map, but really BIGBy Cheryl MFYI, the map is HUGE with lots of detail. Since we were only going to be in certain areas of Denmark (and so we didn't have a map that would fill up the inside of a compact car when unfolded), we cut out the sections we would be using and it worked very well for us.2 of 2 people found the following review helpful. Quite UsefulBy California DougThis map has a scale of 1:300,000 and is quite easy to read. It is also very big when unfolded.The city maps are small but include all streets of any size.I got this map for about half price as "used". There is a 1/2" tear in the cover, but otherwise it is brand new.
