Isaiah Bowman : Desert trails of Atacama, (American Geographical Society. Special publication) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Desert trails of Atacama, (American Geographical Society. Special publication):

Excerpt from Desert Trails of Atacama It has become the fashion to say that major exploration is at an end because the North Pole and the South Pole have been attained and the general design of the mountains, deserts, and drainage systems of the earth has become known. Yet in truth the map is still crowded with scientific mysteries though its great historic mysteries have been swept away. The Mountains of the Moon, the sources of the Nile and the Congo, the secrets of the inner Sahara, the heart of Tibet, these are among the great mysteries that long awaited the explorer and that have been dispelled one by one.
