**Gregory A. Boyd J.D. : Family Maps of Macomb County, Michigan** before purchasing it in order to gage whether or not it would be worth my time, and all praised Family Maps of Macomb County, Michigan:

NOT WORTH THE MONEYBy Michael LaForestI found the same information on USGS topographic maps, but USGS maps have MUCH better graphics (showing roads, churches and cemeteries) and all to scale (1" = 2000'). Binding on this book of maps sometimes interferes with data. Current roads are poorly drawn and names are hard to read and impossible to follow. Some spelling errors on names of families. Very amateurish publication.

224 pages with 47 total maps Locating original landowners in maps has never been an easy task-until now. This

volume in the Family Maps series contains newly created maps of original landowners (patent maps) in what is now Macomb County, Michigan, gleaned from the indexes of the U.S. Bureau of Land Management. But it offers much more than that. For each township in the county, there are two additional maps accompanying the patent map: a road map and a map showing waterways, railroads, and both modern and many historical city-centers and cemeteries. Included are indexes to help you locate what you are looking for, whether you know a person's name, a last name, a place-name, or a cemetery. The combination of maps and indexes are designed to aid researchers of American history or genealogy to explore frontier neighborhoods, examine family migrations, locate hard-to-find cemeteries and towns, as well as locate land based on legal descriptions found in old documents or deeds. The patent-maps are essentially plat maps but instead of depicting owners for a particular year, these maps show original landowners, no matter when the transfer from the federal government was completed. Dates of patents typically begin near the time of statehood and run into the early 1900s. What's Mapped in this book (that you'll not likely find elsewhere) . . . 3612 Parcels of Land (with original landowner names and patent-dates labeled in the relevant map) 46 Cemeteries plus . . . Roads, and existing Rivers, Creeks, Streams, Railroads, and Small-towns (including some historical), etc. What YEARS are these maps for? Here are the counts for parcels of land mapped, by the decade in which the corresponding land patents were issued: Decade Parcel-count 1810s 142 1820s 393 1830s 2930 1840s 78 1850s 19 1860s 2 1910s 12 1920s 33 1930s 5 What Cities and Towns are in Macomb County, Michigan (and in this book)?
