Gregory A. Boyd J.D. : Family Maps of Pulaski County, Arkansas before purchasing it in order to gage whether or not it would be worth my time, and all praised Family Maps of Pulaski County, Arkansas:

0 of 0 people found the following review helpful. Nice book, but not for my needs.By Chicken LipsI honestly bought this book for supplementing my metal detecting research. It did not help. It is a well done book that would might help researchers of genealogy, but probably limited for that also. I was expecting old maps of homesteads, etc, but nope. It basically is the early settlements of Pulaski County and who bought the land. The author did a lot of research, but it unfortunately was not anything that I could use.

301 pages with 86 total maps Locating original landowners in maps has never been an easy task-until now. This volume in the Family Maps series contains newly created maps of original landowners (patent maps) in what is now Pulaski County, Arkansas, gleaned from the indexes of the U.S. Bureau of Land Management. But it offers much more

than that. For each township in the county, there are two additional maps accompanying the patent map: a road map and a map showing waterways, railroads, and both modern and many historical city-centers and cemeteries. Included are indexes to help you locate what you are looking for, whether you know a person's name, a last name, a place-name, or a cemetery. The combination of maps and indexes are designed to aid researchers of American history or genealogy to explore frontier neighborhoods, examine family migrations, locate hard-to-find cemeteries and towns, as well as locate land based on legal descriptions found in old documents or deeds. The patent-maps are essentially plat maps but instead of depicting owners for a particular year, these maps show original landowners, no matter when the transfer from the federal government was completed. Dates of patents typically begin near the time of statehood and run into the early 1900s. What's Mapped in this book (that you'll not likely find elsewhere) . . . 3280 Parcels of Land (with original landowner names and patent-dates labeled in the relevant map) 78 Cemeteries plus . . . Roads, and existing Rivers, Creeks, Streams, Railroads, and Small-towns (including some historical), etc. What YEARS are these maps for? Here are the counts for parcels of land mapped, by the decade in which the corresponding land patents were issued: Decade Parcel-count 1820s 298 1830s 819 1840s 393 1850s 314 1860s 199 1870s 289 1880s 439 1890s 255 1900s 141 1910s 116 1920s 17

What Cities and Towns are in Pulaski County, Arkansas (and in this book)?
