K.K. Venters and S.A. Hiller, A. Ya. Ekman : First Edition of The Atlas of Electronic Spectra of 5 - Nitrofuran Compounds w/ Translation By Israel Program for Scientific Translations before purchasing it in order to gage whether or not it would be worth my time, and all praised First Edition of The Atlas of Electronic Spectra of 5 - Nitrofuran Compounds w/ Translation By Israel Program for Scientific Translations:

The derivatives of 5-nitrofuran are now extensively used in medicine and in veterinary medicine. This atlas comprises the electronic absorption spectra of fifty 5-nitrofuran derivatives, mainly 2 -polyene-substituted compounds. The spectra are plotted both on the linear and on the logarithmic intensity scale. The spectral bandwidth is shown for each absorption band to enable quantitative measurements to be performed. The descriptive part includes general information on the electronic absorption spectra of 5-nitrofurans, as well as a number of general relationships derived by one of the authors from the experimental material in the atlas. This book is intended for chemists and physicists

specializing in heterocyclic compounds
