International Travel Maps : Florida US Deep South Travel Reference Map 1:720K/1:000K before purchasing it in order to gage whether or not it would be worth my time, and all praised Florida US Deep South Travel Reference Map 1:720K/1:000K:

Florida has been unavailable for far too long! We wanted to improve the area of coverage while converting the artwork to a GIS-based digital data base, so the area of coverage now includes Georgia, Alabama, part of Mississippi, and most of the Carolinas. This would be an excellent map to use on the way south (or north) along I-95 or I-85 through Atlanta or Augusta and south to the Gulf Coast. The Panhandle of Florida is on the same side of the sheet, with the second side being devoted to Florida south to the Keys. There isn t enough space to show many insets; just the Orlando area and a Florida map showing population by counties. Another innovation we have introduced is to print the map on waterproof paper, for durability as well as for use as an umbrella during sudden downpours!
