Woods This was a very interesting and useful book when he stuck to what he knew (i.e. all but the last chapter where he shifted more to what he suspected going forward). I live deep in the north woods of

Adirondack Mountains and immediately applied his learning to my property and surrounding area - an area ravaged by fire in early 20th century- plus recent beaver activity and learned enough to explain the "why" of its current situation. It even helped me decide how I should approach how to manage for firewood- particularly if you want as much as possible to return land to a natural, non man affected habitat. It is extremely useful for managing large wooded areas in all of north east including farming area where I grew up. Explains much of what I noticed growing up on the farm. Highly recommend especially for landowners.1 of 1 people found the following review helpful. Must have for anyone who likes to visit the woodsBy Aaron G.This is a thoroughly interesting and useful book. For anyone who like to walk around in the woods and wonders what things looked like 50 or a 150 years ago, this is the book. Easy to follow and not written in hard-to-read verbiage, it's a must for any backpack, along with a Nalgene bottle.0 of 0 people found the following review helpful. for the serious woodland detectiveBy RobeywanA decent companion to his first book. I do wish the photos were a bit better. not easy to take forest landscape views, don't I know.

Take some of the mystery out of a walk in the woods with this new field guide from the author of Reading the Forested Landscape.Thousands of readers have had their experience of being in a forest changed forever by reading Tom Wessels's Reading the Forested Landscape. Was this forest once farmland? Was it logged in the past? Was there ever a major catastrophe like a fire or a wind storm that brought trees down?Now Wessels takes that wonderful ability to discern much of the history of the forest from visual clues and boils it all down to a manageable field guide that you can take out to the woods and use to start playing forest detective yourself. Wessels has created a keya fascinating series of either/or questionsto guide you through the process of analyzing what you see. Youll feel like a woodland Sherlock Holmes. No walk in the woods will ever be the same. 50 color photographs
