IGN : French Guiana Guyane (Guyane française) 1:500,000 Travel Map IGN before purchasing it in order to gauge whether or not it would be worth my time, and all praised French Guiana Guyane (Guyane française) 1:500,000 Travel Map IGN:

French Guiana Guyane (Guyane française) 1:500,000 Travel Map IGN Produced by the French IGN (the French government mapping agency) this is a superb map. The scale of about eight miles to one inch makes the map easy to read and allows masses of information to be shown. Roads (of different grades) are shown, as are all towns and cities. An impression of relief is provided by hill shading and some spot heights. Different types of vegetation eg. forest, mangrove are marked together with places of interest to tourists. The map is fully indexed and includes street plans for Cayenne and Kourou. There is also another inset showing the internal administrative map of the country. Latitude longitude lines are at 30' intervals. Indexed for physical geographic features eg. rivers and mountains, as well as settlements. Map legend is in French only.
