**From Brand: CABI : The Encyclopedia of Ecotourism (Cabi)** before purchasing it in order to gage whether or not it would be worth my time, and all praised The Encyclopedia of Ecotourism (Cabi):

This volume provides an expert, state-of-the-art and comprehensive knowledge base of the rapidly growing global ecotourism sector. It is divided into eight major sections, and contains 41 chapters, individually authored by international researchers and practitioners in ecotourism. Each chapter combines theory and practice in a

complimentary way. The scope of the encyclopedia includes definitions and other contextual material, regional perspectives, venues, impacts, planning and management considerations, and issues associated with ecotourism businesses, research and training.

"This is a very significant contribution to the body of knowledge as it includes both regional case studies and methodologies for applying environmental policies to destinations."--Tourism" valiantly, and successfully, attempts to cover a difficult, diverse and ever-evolving subject. While not a traditional encyclopedia, organized as an alphabetic directory with explanations of terms and topics, it is certainly encyclopedic in its coverage and content. ... In fact, each of the 41 chapters could stand alone as an in-depth treatment of a particular aspect of tourism theory and/or practice. Geographic coverage is also complete ... The result is an extremely comprehensive, insightful and valuable resource ... This encyclopedia ... may be used in any number of ways: as a comprehensive treatise to be read in chronological order; as a textbook which can be excerpted from; as a reference tool for understanding terms, methodologies, practices, theories, etc.; or as a resource for delving deeply into specific topics relating to ecotourism and sustainable tourism."--Abigail Rome, an independent consultant in ecotourism and conservation based outside of Washington, DC  
About the Author David B. Weaver, School of Tourism and Hotel Management, Griffith University.
