The Best Galapagos Guide Out There!By CatherineIf you are planning a trip to the Galapagos, this book is a must have. It covers everything. It begins with the historic and scientific background including Darwin, the ocean currents and arrival of various flora and fauna. Part

Two describes all of the various wildlife on the islands. Part Three describes in detail all of the islands. There are wonderful maps showing the details of anything you can think of looking for on each island. Part Four is dedicated to the Galapagos National Park. There are also sections on diving, practical information, chronology of the islands, appendices, etc. This book is well written, the photos are great and as I said before, the maps are fantastic. 7 of 10 people found the following review helpful. Excellent book
By A Customer
Pierre Constant has created an exceptional book for anyone with interest in the Galapagos Islands. He describes their origin and natural history, as well as details of the flora and fauna on land and in the sea. Lovely color photographs and many diagrams help make this book indispensable for anyone studying or visiting the Galapagos.

- Sixth edition- Written and photographed by a world-recognized expert- Fascinating scientific and historical background- Meticulous descriptions of the flora and fauna, including newly discovered species- Extensive coverage of the 19 largest islands in the archipelago- Detailed discussion and listing of 52 dive sites- Includes a glossary in both Spanish and English- 180 color photos- 70 maps

By far, the best Galpagos guide on the market. Photos are tantalizing as well as truly informative. -- New York Daily News

About the Author
Pierre Constant studied at the University of Pierre and Marie Curie-Paris VI, where he received his degree in Biology-Geology in 1975, followed by a Master's in Geology in 1979. His comprehensive knowledge and expertise on the Galpagos Islands has been made use of in various travel and active sports television productions, including French television and the Discovery Channel. Constant has published over 75 articles worldwide in a range of travel, science and diving magazines. He has been a guest lecturer on many occasions including recently at the 'Royal Geographic Society' in Hong Kong. Pierre is a permanent resident of the Galpagos and will open a Dive center on Isabela Island in 2004.
