**From Brand: Hakluyt Society : The Guiana Travels of Robert Schomburgk / 18351844 / Volume I / Explorations on behalf of the Royal Geographical Society, 1835183 (Hakluyt Society, Third Series)** before purchasing it in order to gage whether or not it would be worth my time, and all praised The Guiana Travels of Robert Schomburgk / 18351844 / Volume I / Explorations on behalf of the Royal Geographical Society, 1835183 (Hakluyt

Society, Third Series):

This is the first of a pair of volumes publishing the full reports of Schomburgk's travels in Guiana between 1835 and 1844, previously available only in greatly abridged and heavily edited versions. Robert Schomburgk left his native Germany for North America in 1828, aged twenty-four. A year later he was in the Caribbean, where, after various business failures, he devoted himself to the investigation of natural history, especially botany. Although he had no previous contact with the Royal Geographical Society in London, the work he submitted to it was of such a quality that he was able to persuade the Society to sponsor explorations in the north-east of South America, an area for which no accurate maps and little reliable information existed. From Schomburgk's arrival in British Guiana in 1835 up to 1839, he explored much of the interior of the colony and completed the arduous overland journey to the Orinoco to connect his survey with that of Alexander von Humboldt. During these expeditions he witnessed maltreatment of Amerindians at the hand of Brazilians, and having ascertained that the boundary between Brazil and British Guiana was undefined he proposed it should be fixed so that those within the British colony would be protected from further harassment. The British Government decided to go ahead with this exercise, and Schomburgk was appointed boundary commissioner with the task of surveying the boundaries of the colony. He did this between 1841 and 1843, returning to London in 1844 to be rewarded with a knighthood for his services. During much of his subsequent career, until his death in 1865, he acted as a British consul, first in Santo Domingo and then in Bangkok.

'The volumes are the result of the painstakingly detailed editorial work done by Peter Riviere... Riviere's accomplished editing of Schomburgk's manuscripts together with his extensive and detailed footnotes and commentary bring to life someone who has been undeservedly almost forgotten in the very country to which he devoted the greater part of his life and labours, namely, Britain.' Itinerario About the Author Peter Riviere is Professor Emeritus of Social Anthropology at the University of Oxford, UK.
