**Andrew Dempster : The Hughs** before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Hughs:

Andrew Dempster has 40 years experience of hillwalking the length and breadth of Scotland. Author of several climbing books, including the first guidebook to the Grahams, in this volume he identifies the best wee hills on the Scottish mainland. MUNRO: at least 3,000ft high CORBETT: 2,5003,000ft high with a prominence of at least 500ft GRAHAM 2,0002,499ft high with a drop of at least 150 metres HUGH: (Hill Under Graham Height): under 2,000ft

with exceptional character. The Hughs all offer rewarding and often stunning climbs and views. Some are already popular. Many await discovery. Each one has great character. That is what the Hughs are all about. From Arthurs Seat in Edinburgh to An Grianan in the far north, from Ben Hiant in the west to Bennachie in the east, the Hughs are a phenomenally diverse range of hills, stretching to all points of the compass. Accessible to people of any age, the Hughs are not defined by the sterile logic of relative height they are a choice of the heart.

0About the Author Andrew Dempster has almost 40 years experience of walking, scrambling and backpacking in the Scottish Highlands and Islands. He has climbed all the Munros twice and the Corbetts, and wrote the only guidebook to the Grahams (mountains 2,000-2,500 feet in height). He has also walked, trekked and climbed extensively in such varied locations as the Alps, the Pyrenees, the Himalaya, Africa, Iceland and Greenland. The Highlands of Scotland are his first love, however, and he lives in rural Perthshire with his wife, Heather and son, Ruairidh.
