I'm using it to plan my trip up the north shore of Lake Superior in the future. Would highly recommend this.0 of 0 people found the following review helpful. Superior Images of Lake SuperiorBy TundraBeeHow many superlatives can I heap on this "coffee table" size compilation of Craig Blacklock's stunning photographs? Let me count the plates: there are 154 - taken at various times of the year, while journeying by kayak around Lake Superior. Each "chapter" is a segment in the journey and each plate is attributed to a point on the map. My favorites: plate 77, "Small island east of Rosspport, December, 1985; and plate 94, "Devil's Chair (center island) Lake Superior Provincial Park,(Canada,) July 1991.There's a message in these beautiful photos and essays. We must preserve natural balance. As Linda Benedict-Jones says in the Introduction: "...One of the specific wishes of Blacklock... is that the remaining undeveloped lake shoreline be kept for open access. When he silently glides for months on end around the periphery of the lake, he does it with the hope that his pictures will convince others to appreciate the lake as he does. Lake Superior is simply too profound as a spiritual resource to be guarded by a

privileged few. Should these last open stretches be developed, they will forever be out of reach by the general public. We have learned precious little from the examples set for us by the Navajo (Dineh), the Dakota and the Anishinabe. We all know that Native Americans lived in harmony with the earth and believed that land could be neither bought nor sold since it belonged to all. Perhaps it is not too late to apply their wisdom to relatively small, yet hugely important, areas of land bordering the Great Lakes. Perhaps these Blacklock photographs will help preserve public access to Lake Superior's shores, as certain photographic efforts of his 19th Century predecessors helped to convince (the U.S.) Congress to establish national parklands of the Yosemite, Yellowstone, the Grand Tetons and others." Pass it on!
