

city, and the shopping listings were a fairly unique feature which would probably be particularly helpful for a longer stay with younger kids. We found the most wonderful toy store inside Au Bon Marche thanks to this book; as a department store its facade gave no hint of the extensive toy selection on one floor. I found the restaurant listings less useful; clearly my family's food tastes differ from those of the author. In particular I would not recommend eating inside the Grande Galerie de Evolution if you are visiting Jardin des Plantes. The book is printed on heavy glossy pages with beautiful color photos, which made it a bit heavy for its small size; however, I could easily slip it in my purse and peruse it over lunch. There are no maps but you can easily get one from your hotel or just use a smartphone. 6 of 6 people found the following review helpful. Helpful, practical, handy By Hakusan I relied heavily on this book on our recent trip to Paris with our 6-year-old. It had really helpful and practical information, organized by neighborhood. The tone of the book is very down-to-earth and realistic- you can tell it was written by a mom of three kids. There were a lot of really helpful tips in the beginning of the book, for example, on babysitting services. The book is very comprehensive. It is also very small in size, so it was really easy to carry around on our expeditions in Paris. It covers both major tourist spots and more out-of-the-way places. The info on family-friendly restaurants was super helpful and there was also info about great children's stores in Paris. Most of the other books I had seemed aimed at slightly older kids; this book definitely had info for younger kids as well as older kids. 4 of 4 people found the following review helpful. Great guide to useful and interesting spots By Addicted to words This guide is organized to help parents keep kids interested, exercised, fed, and clean. The author notes bathrooms, family friendly restaurants, and parks near famous sites so that parents can create a smart plan for a day of sightseeing in Paris. Super helpful if you are travelling with toddlers or elementary school kids, but still informative, well organized and useful for those of us with tweens. Would love to see a version of this from the same author with ideas for eye-rolling teens.

The Little Bookroom Guide to Paris with Children focuses on what sophisticated parents with good taste want to know: how to see Paris's most important sights and neighborhoods in a child-centered way in this case, through the eyes and experiences of author Kim Horton Levesque and her three research assistants, her daughters. Organized around places to eat, play, and shop, there's lots of information on family-friendly restaurants (yes, they exist in Paris), classic cafes where Parisians take their children, items on Parisian menus that appeal to children, charming tea salons for your little Madeline, ice-cream stands and parlors for everybody, and places for picnicking and snacking; parks and playgrounds near attractions, and how to feel at home in the parks, including all you need to know about pony rides, marionette shows, model-boat rentals, merry-go-rounds, and more; where to shop with children and for them, including the best places to find quintessential French children's clothing (espadrilles, striped sailors jerseys, and, this being France, perfume for babies!) as well as the best baby gear and toys at both exclusive shops and chain stores. Levesque also profiles the best small boutiques that feature French designers for children's clothing and artisanal toys. The guide also includes practical advice on finding a babysitter in a pinch or an English-speaking playgroup; words you may need at pharmacies, whether the problem is a sore throat, blisters, or an upset stomach; and how to locate a toilet when your child needs one. And you'll feel comfortable anywhere in the city after the author debriefs you on stroller etiquette. Levesque also provides fascinating glimpses into the lives of Parisian children: typical school lunches (a cheese course? bien sr!); the all-important after-school *gouter*; the classic French *layette*; formula and baby food (forget applesauce, think *ratatouille*, potato leek, artichoke, and more); and all sorts of fascinating and useful information that will make your trip *en famille* an easy and pleasurable one. *Bon voyage!*
