E. Andrew Martonyi : The Little Man In the Map Teaches the State Capitals! before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Little Man In the Map Teaches the State Capitals!:

0 of 0 people found the following review helpful. Good information but lacks the charm from the original By Tricia We loved The Little Man In the Map so much we were really looking forward to this one. We were a little disappointed, it lacks the same illustration and vibrancy that we loved in the original. It still has clever ways of trying to memorize,

just not as riveting and endearing as the States one.0 of 0 people found the following review helpful. There's NO little man.By Hank A. GautreauxThis book is good, not as good as "Yo, Sacramento!" But we can't figure out for the life of us why it is called the Little Man in the Map? He makes absolutely no appearance in the whole book except on the cover. So don't think this is a companion to "The Little Man in the Map" book about where the states are located.0 of 0 people found the following review helpful. Teh Little Man In the Map Teaches the StatesBy KayWonderful teaching tool! My teacher friend's 5th grade boys loved it so much, they were inspired to have competitions to see who could learn the states in record time. Best of all, they were able to retain what they learned.. .

From the author of the award-winning *The Little Man In the Map: With Clues To Remember All 50 States* comes its eagerly awaited companion book, *The Little Man In the Map Teaches the State Capitals!* Following the proven method of its predecessor, this clever paper-bound volume uses memory aids, well-laced with humor, to help anyone learn the U.S. capitals. A *How To Use* section explaining the simple and effective method is followed by an alphabetical listing where a two-page spread is devoted to each state/capital unit. The left-hand page establishes word clues based on word associations derived from the sounds of the names of the state and its capital; the facing page brings the word clues together in two to four rhymed lines placed under a humorous cartoon that reinforces the story. The book will appeal to a wide range of ages, from elementary to high school students. They will surely be joined by some of their parents who will find themselves finally remembering even the more elusive state capitals.

About the AuthorE. Andrew Martonyi, award winning author, public speaker, trainer, and businessman, has traveled the world to give seminars to thousands of people. His love of travel was tested early in youth when his family crossed the Atlantic to land at Ellis Island. As a young man he drove across the US, where the Rocky Mountains, the deserts and the Pacific Ocean made him fall in love with the West. He moved to California where he lived on a boat for a while, writing poems of love and adventure. His wife, Irma, shares his enthusiasm for travel and the outdoors, and together they have hiked the Grand Canyon and camped in many states across the U.S. They continue to make their home in California.
