**Carleton Beals : The long land: Chile (Invitation to travel series)** before purchasing it in order to gage whether or not it would be worth my time, and all praised The long land: Chile (Invitation to travel series):

Chile, Land of ContrastsThe "crazy geography" of Chile will delight lovers of diversity, wilderness and authenticity. Imagine a country surrounded on the west by the Pacific Ocean, on the east by the Andes, in the north by the Atacama Desert and the south by the glaciers of Patagonia, Tierra del Fuego and Antarctica ... Chile is nothing less than that a true invitation to travel.Chile is located in the extreme southwest of South America and is bordered with Peru in the north, Bolivia to the northeast and east with Argentina. It is a long and narrow strip of land 180 km average wide about 4300 km long north-south oriented (for comparison is the distance between Oslo and Baghdad). Its area , including the mainland, Easter Island and the Juan Fernndez archipelago (Robinson Crusoe Island ) is 756 626 km<sup>2</sup>. Throughout this long strip of land there is a succession of deserts and canyons, snow-capped volcanoes, lakes, glaciers, fjord, steppes, with in the backdrop the majestic Andes rising to nearly 7,000 m.
